

Tray Inserter

EMERALD
AUTOMATION

International Automation & Innovation

The **Tray Inserter** selects one or two smaller trays, erected by a Trayformer, and inserts them into a sleeve.

Emerald Automation integrates a diverse yet practical approach to machinery design to provide rugged construction complemented with state-of-the-art technologies. Whether it's developing a machine to supply a new market, or rebuilding existing machines with new technology, we will work to provide our customers with solutions that meet their individual needs.
